

## SC Department of Employment and Workforce

### NEWS RELEASE

**For Immediate Release:  
June 17, 2011**

### **South Carolina's Employment Situation May 2011**

*Unemployment rate ticks up slightly; Job gains still seen in several sectors*

South Carolina's seasonally adjusted unemployment rate increased from 9.8 percent in April to 10.0 percent in May, similar to the national rate increase from 9.0 percent in April to 9.1 percent in May.

A slight uptick in unemployment is typical for this time of year as college and high school graduates enter the labor pool, and more people seek seasonal work in tourism-related areas.

Based on the federal survey of households, the state saw a slight movement upward in May's labor force estimates when compared to April. An increase of 2,769 was noted for an overall level of 2,155,120 people in the labor force.

According to the Bureau of Labor Statistics, the Anderson metro area experienced one of the largest employment percentage gains nationally, from April 2010 to April 2011, with a 5.1 percent increase.

South Carolina's nonfarm payroll employment increased 5,200 in May to a total of 1,833,100 and is the fourth monthly gain in employment since January. It represents a 4.12 percent overall increase since its lowest point in January 2010.

Gains were reflected in four major industry sectors. Leisure and Hospitality enjoyed the largest increase, adding about 6,600 jobs. Trade, Transportation and Utilities boasted a gain of 3,400 jobs, mostly due to seasonal gains in Retail Trade, up 3,000 jobs. Manufacturing showed its fourth monthly increase this year by adding 1,200 jobs, and Financial Activities increased 300 jobs during the month. These gains offset decreases in the Education and Health Services, Government, and Professional and Business Services industry sectors. Online postings of job openings have increased by 1,300 in the last month, as reported by the Conference Board's Help Wanted Online Index, showing that employers are more eager to hire than they were last month.

"Although there was a slight uptick in the unemployment rate, the number of people who found employment has increased steadily for eight of the last nine months, and since May 2010, the estimated percentage of unemployed persons has declined by approximately 10.4 percent," said SC Department of Employment and Workforce Executive Director John Finan. "South Carolina continues to maintain the status of having one of the fastest declining percentages in the Southeast."

The trend of decreasing initial claims for state unemployment benefits continued in May, with only 19,264 claims filed, much less than the high of 84,103 in January 2009. In fact, South Carolina's number of initial claims for May 2011 is lower than all other states in the southeast.

The duration of unemployment payments has also declined in South Carolina, dropping 2.5 weeks from a high of 18.9 weeks in 2010 to 16.4 weeks in 2011. In the Southeast, only Alabama has a shorter duration.
